PROFESSIONAL SUMMARY

Frontend / Full Stack Web Developer with hands-on experience building responsive and scalable web applications using React.js, JavaScript, Node.js, Express.js, and MongoDB. Experienced in developing modern user interfaces, RESTful APIs, CRUD operations, authentication, database-driven applications, and frontend-backend integrations. Built and deployed full-stack applications on Vercel and Render, with a strong focus on clean, responsive, and maintainable web solutions.

EDUCATION

Sheat College, MGKVP Varanasi
Bachelor of Computer Application (BCA)

2024
Varanasi

- Built a strong foundation in programming, data structures, database management, and web technologies.
- Completed multiple academic and self-driven projects applying core computer science concepts to real-world applications.

Kisan Inter College, UP Board
Intermediate (Class XII)

2021

A N R Inter College, UP Board
High School (Class X)

2019

PROJECTS

Management Dashboard | *React.js, Node.js, Express.js, MongoDB*

- Built a full-stack CRM-style application for managing and tracking lead records using React.js, Node.js, Express.js, and MongoDB..
- Developed RESTful APIs supporting search, filtering, sorting, pagination, and individual lead retrieval for efficient data management.
- Implemented authentication, responsive UI, and analytics metrics with separate frontend and backend architecture..

Task Tracker Web Application | *React.js, Node.js, Express.js, MongoDB, Tailwind CSS*

- Built and deployed a full-stack task management application with CRUD operations for creating, updating, tracking, and deleting tasks.
- Developed REST APIs with Node.js and Express.js and integrated MongoDB Atlas with Mongoose for persistent data storage.
- Implemented task status, priority, due-date management, validation, and responsive UI using React.js and Tailwind CSS.

Pipeline Builder | *React, Vite, ReactFlow, Node.js, Express.js*

- Built a visual workflow builder with ReactFlow enabling users to create, connect, and manage pipeline nodes through a drag-and-drop interface.
- Implemented custom Input, Text, and Output nodes with dynamic node and edge handling using React and ReactFlow.
- Developed backend DAG validation and API-based pipeline analysis to verify node connectivity and return node/edge counts.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, Python

Frontend: React.js, Tailwind CSS, Bootstrap, Responsive Web Design, ReactFlow

Backend: Node.js, Express.js, RESTful APIs

Database: MongoDB, MongoDB Atlas, Mongoose

Tools & Platforms: Git, GitHub, Postman, VS Code,

EXTRA ACTIVITIES

Full Stack Developer
Personal Projects

- Developed and deployed multiple MERN stack applications using modern web technologies..
- Deployed and maintained live applications on cloud platforms such as Render and Vercel.
- Followed clean coding practices and maintained consistent version control using Git and GitHub.
